Third-year BSc Information Technology student with practical experience in Python, Java, C#, databases, web development and user-interface testing. I have developed desktop applications and Python games that demonstrate problem-solving, object-oriented programming and attention to usability. I am currently expanding my knowledge of agentic AI, retrieval-augmented generation and AI workflow orchestration, with the goal of pursuing a career in AI software engineering.

Education

BSc Information Technology – North-West University

Expected Graduation: 2027

Relevant Modules: Software Engineering, Database Systems, Data Structures, Object-Oriented Programming, Systems Analysis and Design

Technical Skills

Programming Languages: Python, Java, C#

Web Technologies: HTML, CSS, JavaScript

Databases: SQL Server, MySQL, SQLite

Development Tools: Visual Studio, Visual Studio Code, IntelliJ IDEA, Eclipse, Git, GitHub

Current AI Focus: Agentic AI, Retrieval-Augmented Generation, Multi-Agent Systems, Embeddings and Vector Search

Additional Skills: Data Analysis, Problem-Solving, UI Testing, Teamwork, Technical Documentation

Version Control: Git, GitHub, repository management, commits and basic branch workflows

Hardware: Custom PC assembly, component compatibility, BIOS configuration, operating-system installation and troubleshooting

Typing: Up to 140 WPM

Projects

Pixel Kingdom Snake | Python, Turtle

Developed an arcade-style Snake game featuring keyboard controls, collision detection, scoring, persistent high scores, progressive speed, pause functionality and game restart controls.

Modernized Ping Pong | Python, Turtle

Built a two-player game using object-oriented programming, responsive keyboard controls, timer-based movement, paddle and ball collision mechanics, scoring, pause and restart functionality.

Experience / Academic Projects

PROSPERA Course and Skills Management System | C#, Windows Forms, SQL Server

Collaborated in a university group to develop a desktop course and skills management system. Contributed to backend logic, database connectivity, form validation, data-management functionality and user-interface testing.

Additional Projects

Projects: Python calculator, password generator, offline login system and C# number-guessing game

Hobbies & Interests

Interests: Artificial intelligence, PC building, chess, strategy games and fitness
