PROFESSIONAL SUMMARY

Third-year BSc Information Technology student at North-West University with practical experience building Python games and C#/SQL Server desktop applications. Comfortable with object-oriented programming, database integration, user interface testing, Git/GitHub and front-end web development. Currently exploring agentic AI, retrieval-augmented generation, multi-agent systems, embeddings and AI workflow orchestration, with the goal of growing into AI software engineering.

EDUCATION

BSc Information Technology | North-West University | Expected graduation: 2027

Relevant coursework: Software Engineering, Database Systems, Data Structures, Object-Oriented Programming, Systems Analysis and Design

TECHNICAL SKILLS

Programming: Python, Java, C#

Web technologies: HTML, CSS, JavaScript

Databases: SQL Server, MySQL, SQLite

Development tools: Visual Studio, Visual Studio Code, IntelliJ IDEA, Eclipse, Git and GitHub

Current AI focus: Agentic AI, retrieval-augmented generation, multi-agent systems, embeddings and vector search

Additional strengths: UI testing, teamwork, PC assembly and troubleshooting, 140 WPM typing speed

SELECTED PROJECTS

PROSPERA Course and Skills Management System | C#, Windows Forms, SQL Server

Collaborated in a university team to build a desktop course and skills management system. Contributed to backend logic, database connectivity, input validation, data management and user interface testing.

Pixel Kingdom Snake | Python, Turtle

Developed an arcade-style Snake game with responsive keyboard controls, collision detection, persistent high scores, progressive speed, pause and restart controls, and a custom visual theme.

Modernized Ping Pong | Python, Turtle

Built a two-player game using object-oriented design, simultaneous keyboard input, timer-based movement, collision mechanics, scoring, pause and restart controls, and a first-to-seven win condition.

INDUSTRY EXPOSURE

RAiN Vacation Work Case Study

Participated in a case study exploring how information technology and AI can support accounting and auditing workflows. Collaborated on and presented a proposed solution, receiving positive feedback and an invitation to interview.

ADDITIONAL PROJECTS & INTERESTS

Additional projects: Python calculator, password generator, offline login system and C# number-guessing game.

Interests: Artificial intelligence, PC building, chess, strategy games and fitness
