

Farodian Eloham Freeks

Potchefstroom, South Africa | 0658193497 | farodian1811@gmail.com

I am an enthusiastic BSc Information Technology student with exposure to software development, data analysis, and system design through coursework and projects. I am passionate about creating efficient, user-friendly solutions as well as the constant exploration of new technologies through some of my personal “pet programs”. I enjoy coding in my spare time, and I have also created a few small-scale applications and automation tools using Python, Java as well as C#. I am eager to contribute creativity, technical expertise and problem-solving skills within your company.

Education

BSc Information Technology – North-West University | Expected Graduation: 2027

Key Modules: Software Engineering, Database systems, Data structures, Object-Oriented Programming (Java, C#)

Technical Skills

Languages: Python, Java, C#

Framework & Tools: Visual Studio, IntelliJ IDEA, Eclipse

Database: MySQL, SQLite

Other Skills: Data Analysis, Problem-Solving, 140WPM typing speed

Projects

Snake Game – Python

- Independently developed a retro-inspired snake game using Python and Turtle graphics as a personal project, demonstrating initiative and applying core programming concepts such as real-time input handling, collision detection, and game loop logic.

Ping Pong Game – Python

- Designed and built a two-player ping pong game using Python and Turtle graphics as a personal project, showcasing understanding of object-oriented programming, collision mechanics, and real-time user input handling.

Personal Pet Programs

- I enjoy experimenting with new frameworks as well as building creative solutions for personal use and learning.
- Python games
- Simple Calculator
- Password Generator
- Login System (Offline)
- Number guessing game using C#

Experience / Academic Projects

Software Development Group Project – North-West University

- Collaborated with a team to design a full-stack course management system.
- Responsible for backend logic, database connections, and UI testing.

Hobbies & Interests

- Gaming and exploring AI-based tools.
- Problem solving challenges
- Increasing my touch-typing speed
- Gym
- Developing personal pet programs and experimenting with beta programs
